

Value of Pi

Question:

Should the value of pi be legally changed to 3.0?

1. Choose your stance-

The value of pi should be changed to 3.0.

OR

The value of pi should NOT be changed to 3.0.

2. Review your data. Use specific examples from your data. How will calculations such as circumference, area, and volume be changed?

3. How would the speed of cars be affected? (remember our in class activity)

4. What other things rely on circles? How would these things be affected? Provide examples and HOW they are affected.

SUPPORT YOUR CHOICE WITH DATA AND EXAMPLES.
