

Development Plan Assignment

Together with your group, create a long-term plan for development of housing, businesses, and industry for Eastern North Carolina that will help restore the hydrosphere and water cycle. Show that you understand the effects of development on the hydrosphere, and be creative in thinking of ways to limit those effects. Address requirements for developers, approximately how much development you will allow, and how your plan will benefit Eastern North Carolina and help prevent another flood disaster like that of Hurricane Floyd.
